

On September 16th, 2009

YOU ARE INVITED TO AN **INTEROPERABILITY** CONFERENCE ON:

USING TECHNOLOGY TO ACHIEVE COMMUNICATIONS INTEROPERABILITY TODAY

Enable Your Existing Equipment to Meet and Exceed P25 Compliance.

Feature Speakers to Include:

- ◆ Tom Guthrie, CEO of Twisted Pair Solutions Inc., developers of WAVE
- ◆ A Representative from the Nations Largest Medical Air Evacuation Unit, located in Missouri, and a user of the WAVE System
- ◆ Technical persons from Twisted Pair to answer your individual questions

Summary of Topics to be discussed

- What is P25 compliance?
- How WAVE meets and exceeds it today.
- How the system manages secure real time group communications and allows for interoperable communications between any connected devices.
- How Wave does not restrict you to equipment of a certain type.
- How WAVE will work with your current radio system and connect with any radio equipment from any manufacturer at any frequency.
- Explanation of how the Flexibility, Scalability, Portability and Transmission Quality, of WAVE will extend the reach and useful life of your current system.
- A live demonstration of completely disparate systems communicating, illustrating the flexibility and affordability of the system.

DON'T MISS THIS OPPURTUNITY

WAVE IS , WHAT YOU HAVE BEEN LOOKING FOR!

Lunch will be Served
Starts at 1:00 PM
Ends at 3:00 PM
