

Syllabus for T&RA v3.6

Objectives

Module 0: Welcome and Introduction

Course Objective

Upon completion of this program, participants will develop, through the use of an interactive workshop model, the skills necessary to conduct comprehensive risk assessments and identify administrative and operational needs. The process taught in this program will use instruments developed by the National Preparedness Directorate, National Integration Center, and the Training and Exercise Integration Secretariat.

Module 1: Jurisdictional Assessments Overview

Terminal Objective

Provide an overview of the Domestic Preparedness Assessment Program provided by the Department of Homeland Security.

Enabling Objectives

- Describe the history, mission and objectives, funding, and organizational structure of the domestic preparedness assessment program
- Describe the benefits of multi-discipline working groups
- Preview the Risk & Needs Assessment process

Module 2: Terrorism and Threat Assessment

Terminal Objective

Conduct a threat assessment and determine the **Jurisdictional Threat Rating**.

Enabling Objectives

- **Define** terrorism, PTE and WMD
- **Discuss** motivations and potential targets
- **Identify** and describe types of CBRNE
- **Assess** a PTE in accordance with the threat assessment criteria

Module 3: Vulnerability Assessments

Terminal Objective

Participants will be able to conduct site surveys of selected facilities and determine strength and vulnerabilities relevant to the National Response Framework (NRF) to include all-hazards and CBRNE events.

Enabling Objectives

- Conduct a site survey and complete the Individual Target Vulnerability Summary
- Describe the seven vulnerability factors
- Discuss strategies to improve potential target security
- Develop and deliver a presentation on site strengths and vulnerabilities

Module 4: Planning Factors

Terminal Objective

Determine incident planning factor values from plausible events within the scope of the National Response Framework (NRF) to include all-hazards and CBRNE.

Enabling Objectives

- List and apply the planning factors process for the Basic (VA) and Agricultural (AVA) Vulnerability Assessments.
- Develop a plausible NRF/CBRNE/All-hazards incident with planning factor values modeled after the DHS National Planning Scenarios made specific to your jurisdictional sites and facilities.

Module 5: Capabilities – Based Planning

Terminal Objectives

Determine the Desired and Current Task Capabilities to respond to potential All-hazard scenarios.

Enabling Objectives

Determine

- Jurisdiction responsibilities & tasks
- Emergency response disciplines
- Desired Tasks and Capabilities
- NRF/CBRNE/All-hazards Response Levels
- Current Capabilities

Module 6: Needs Assessment

Terminal Objective

Determine the Discipline and Jurisdiction Needs to enhance emergency response for an NRF/CBRNE/All-hazards incident.

Enabling Objectives

- Understand the relationship of the NRF/CBRNE/All-hazards scenarios, planning factors, capability assessments, and solution areas
- Determine the local jurisdiction needs in the five solution areas (POETE)
