

With the help of the Missouri Highway Patrol Commercial Motor Vehicle Enforcement Division, please find below one component of the Statewide Transportation Flow Study. Special thanks to Captain Londell Jamerson and Asst. Director Debbie Bax

This information was captured on CMV inspections from 10/1/08 – 9/30/09. There were 8,614 data sets reviewed and input. Please note that there are strong contrasts to that of the fixed facility analysis that was completed for you last week. The MERC will continue to analyze and review these graphs of which will be incorporated into the overall gap analysis.

We find it very interesting and beneficial to understand for planning and training purposes.

- 2 Gases
- 3 Flammable liquids
- 4 Flammable Solids
- 5 Oxidizing substances
- 6 Toxic/Infectious
- 7 Radioactive
- 8 Corrosive
- 9 Miscellaneous
