- Class Title:** PER332 Population Monitoring for Community Reception Center (DHS Approved) (POST Approved)
- Class Date:** May 2, 2016
- Sponsor(s):** Missouri State Emergency Management Agency, St Louis Regional Radiological Response Medical Reserve, St. Louis Area Regional Response System (STARRS) Training and Exercise Committee, and the CTOS – Center for Radiological/Nuclear Training
- Course Description:** This course trains emergency responders and non-uniformed support personnel to operate monitoring stations within the Community Reception Center (CRC) or similar reception centers in order to perform population monitoring and contamination reduction measures after a radiological or nuclear incident. Examples of incidents that would initiate the establishment of a CRC include a nuclear detonation such as an Improvised Nuclear Device (IND), Radiological Dispersal Device (RDD), an attack on a Nuclear Power Plant (NPP) or other incidents that expose the general population to radioactive contamination. Responders learn the basic operation of radiation detectors, dosimeters, portal monitors, personal protective equipment (PPE) selection, and decontamination procedures. Attendees are taught to conduct radiological surveys of personnel and vehicles. Attendees are encouraged to bring their own department's instruments if possible. This course uses radioactive material to provide realism in order to replicate various scenarios the responder may encounter.
- Target Audience:** Emergency Management, Fire Service, Law Enforcement, Emergency Medical Services, Governmental Administrative, Healthcare, HazMat, Public Health, Volunteer Agencies
- Prerequisite:** Completion of the AWR140 or AWR140-W. The online AWR140-W can be found and completed at <http://www.nts-ctos.com>.
